FAIRSPLIT®
DIVIDE THINGS, NOT FAMILIES

AI-ASSISTED SHARABLE HOME INVENTORY

For families looking for ways to share asset information in estate settlement, planning, or even divorces, FairSplit Shareable Home Inventory will work well for many. It allows easy listing and sharing of information in your own secure private family account, with participant "roles", allowing help with listing, valuing, or only observing. Participants login from anywhere, saving time, travel and avoiding conflict challenges of being in the same room. Asset details are able to be sorted, viewed and printed by property, category, room, value, etc.

When solutions are needed to figure out what is wanted, what can be sold or donated, or who gets what, upgrades to FairSplit's patented division tools provide a path to achieve fair and peaceful divisions.

TRANSPARENCY / TRUST

FAIRSPLIT PROVIDES A PATH TO FAIR AND PEACEFUL DIVISIONS

EASY UPGRADE | Uses the same Shareable Home Inventory already setup – 3 Step Process:

1/ ASSET REVIEW ROUND | Confirm YES/No, interested or not?

2/ EMOTIONAL VALUE ROUND | Who wants what the most? Based on Emotional Value bidding points on a limited number of items

3/ALTERNATING SELECTION ORDER | Each Divisee organizes item preferences, top to bottom; assets awarded, simulating drawing straws and awarding top on each list in a 1234, 4321, 2341…

ITEMS DESTINATIONS | Designate what goes where to manage, sell, donate, your move destination room, estate planning, etc.
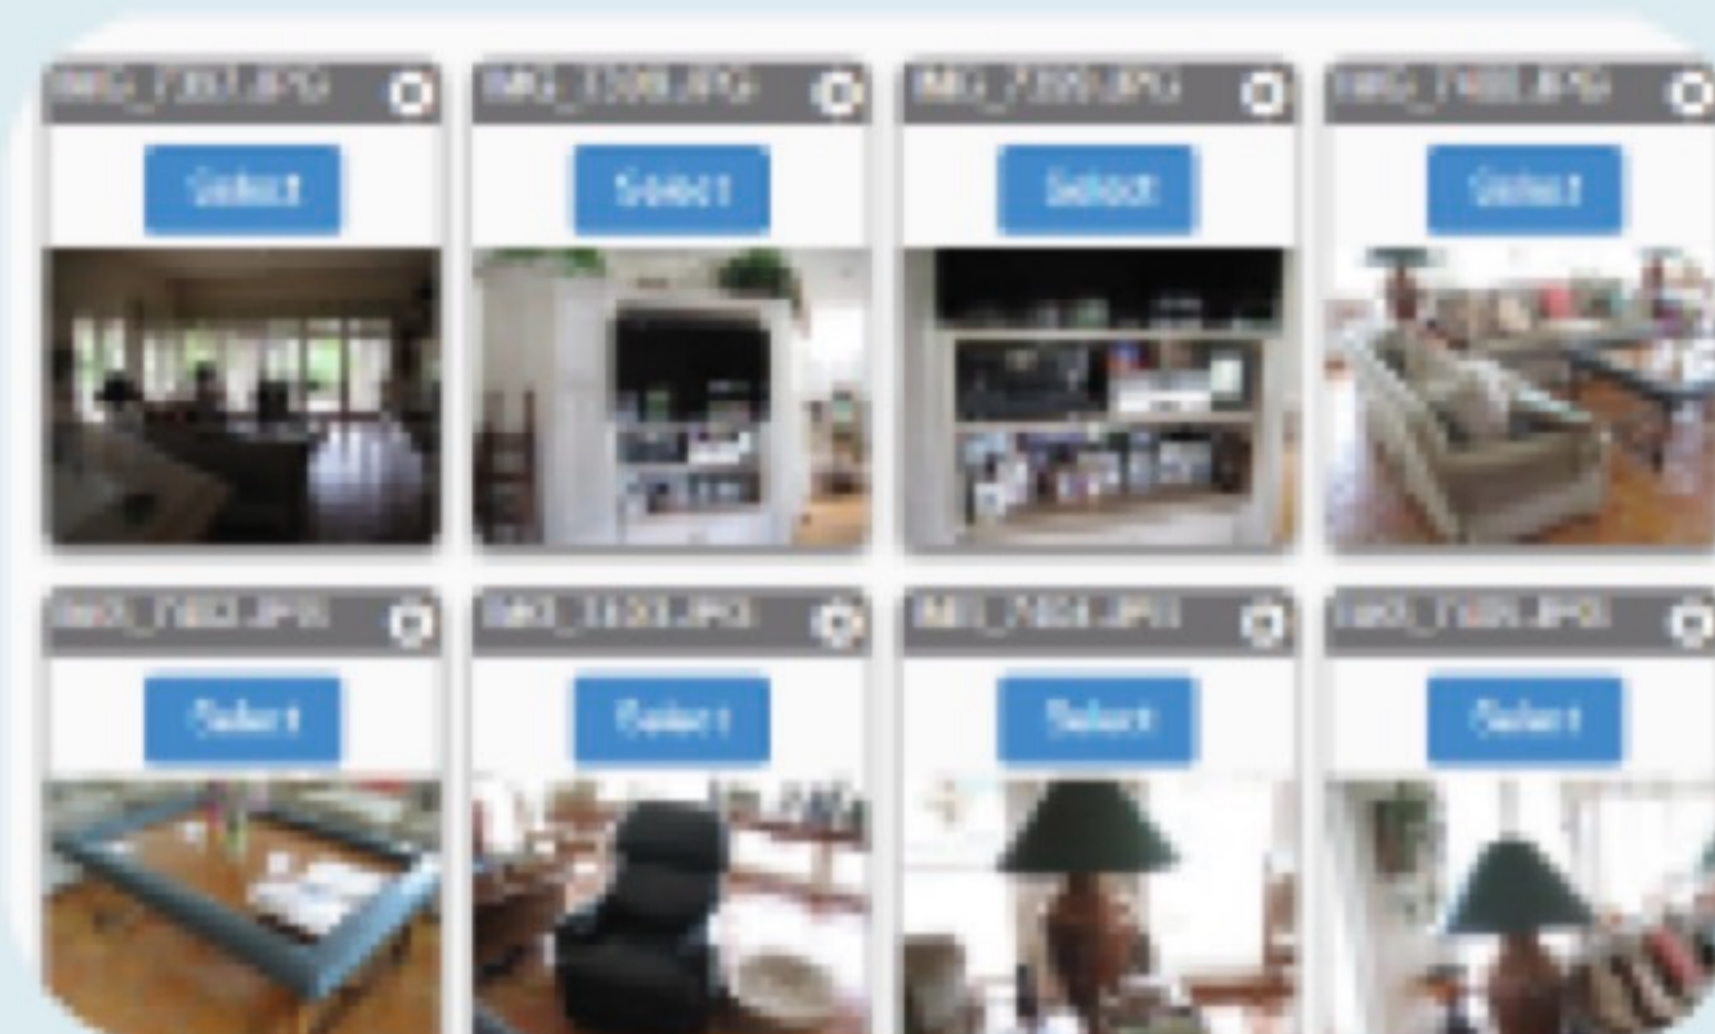

DIVISION STATS | Tracks quantities and values assigned to each destination

CREATE REPORTS | Printable and exportable reports to manage and memorialize results
